

The diagram illustrates a power distribution system with 12 feeders. The main busbar is connected to a 630A circuit breaker (OS1) and a 5kV source. Each feeder has its own transformer (TV11) and a 630A circuit breaker (OS1). The feeders are labeled 1 through 12, corresponding to the table above. The diagram includes a source of 5kV and a 630A circuit breaker.
